

# SADDLE SOLUTIONS FOR ALL!

**All Saddle Solutions** are a brand new company offering handcrafted, bespoke saddles – the brainchild of Claire Fitzmaurice and Toby Blake.

Claire and Toby are professional riders and trainers and combine over 40 years experience in the equestrian business. One of the major problems that they have encountered within that time has been badly made/fitting saddles.

As many are well aware, this can lead to the horse having physical problems – back pain, stiffness, unlevel strides etc. Then possibly to behavioural problems – lack of performance, bucking, rearing, napping etc.

“The first thing I do when I take a horse in for training is to get it’s back checked out. Many turn up with saddle related problems which have to be rectified before I can begin schooling” says Toby.

After working with an award winning saddlemaker, All Saddle Solutions have designed a range of saddles that should suit most horses and riders. Check them out on [www.allsaddlesolutions.com](http://www.allsaddlesolutions.com)

Performance, freedom, comfort and stability are keywords for All Saddle Solutions. With design features such as extra wide gullets, ultra soft panels with a large bearing surface and an innovative girthing system they feel they’ve got it just right.

“I recently purchased a jumping saddle and a dressage saddle from A.S.S for my 6 year old mare **Summersong**, who currently competes at novice level BE. Previous to purchasing these saddles, my mare was incredibly sensitive in her back. I have had my saddles for 2 months and the difference in her is amazing!”

From ordering, your saddle will be ready in around 4 weeks. It is then fitted precisely to your horse using the Flair system, which is incorporated into our super soft panels along with 2 layers of foam. It is recommended that the saddle fit is checked within the first 3 months as many horses appear to develop more muscle over their backs quite quickly due to the increased freedom allowed by the panels. This is followed by standard 6 monthly checks as advised by vets and physios for all saddle makes.

“Aftercare is just as important as the original fitting. We aim to provide a complete service to enable you to get years of enjoyment from your saddle” says Claire who covers the North of England and can be contacted on 07970558437. Toby can be contacted on 07968495235 and covers the South.
